

Cove

Cove 24w - 80w T5

An angled cove fitting for linear uplighting using fluorescent lamps for efficiency.

The fitting uses the latest **High Frequency** Ballasts and lamps to give an average lamp life of **30,000 hours**.

The Altima Light Efficiency label indicates that the lamps and design meet the UK Part **L1** Building Regulation specifications for energy use and light output in residential and commercial applications.

Dimmable systems can be supplied.

The range is supplied in modular lengths to be used individually or in continuous runs.

Mitred corners are available and we provide a bespoke service to supply cut to fit sizes.
