

Surface Brackets

A two piece set is provided for direct mounting to a ceiling, wall of shelf.

Fixing is easily achieved by attaching the fixing to the surface then securing the track with a 90° turn.

A major advantage is that the fixing can be positioned at any point along the track to pick up joists or the structural points.

Set of 2

Floating Suspension

A Floating Suspension, 55mm deep is provided to suspend the track a short distance from the ceiling.

This can be adjusted a maximum of 10mm in height to level the track or take-up the undulation on an uneven ceiling.

LV.SF0.0010.57 White 60mm

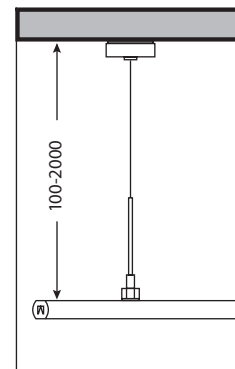

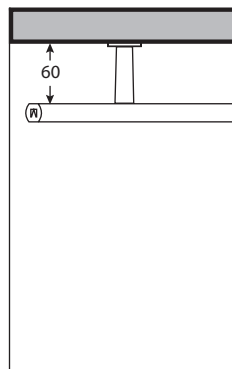

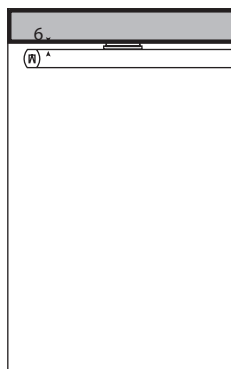

Wire Suspension

Adjusted length wire mounting system for ceilings or the horizontal surfaces.

Supplied with 2m of cable. A novel ball-catch allows leveling adjustment on the track.
