

LVTrack

Track Information

Altima low voltage track lighting is designed and manufactured in the UK. It exploits the quality and compact dimension of 12 volt halogen lamp, providing versatile and stylish architectural display lighting systems.

The compact track can be fitted directly to walls, ceilings, display cabinets and under shelving where space may be at a premium.

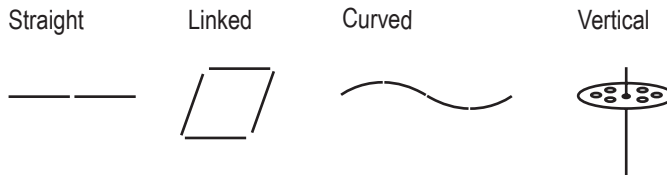

Meters

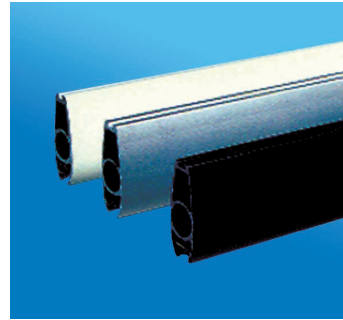

Track - detailed dimensions

Straight and flexible couplers allow continuous runs of up to 12m of track incorporating level changes and bends up to 180 degrees (subject to using a total of 300v between isolating connectors).

The altima track system has a simple and convenient clip-in power connector which can be easily fitted anywhere along the track and attractive surface mounted transformers (60va - 300va) which compliment the track and fittings.

Altima's range of fittings include spotlights and pendants which utilise dichroic, halopin and capsule lamps.

Single Track 12v 300VA

Double Track 12v 300VA

Foil Track 12v 300VA

A 12v linear system into which light fittings can be positioned at any point.

Offers additional benefits of both down and uplighting from a double-sided track. Two power-feeds are required.

Strong, slim and elegant with an aerofoil section.
