

Silent Rotary Dimmer Controls – Low Voltage and Tungsten

600 watts

The Wafer range includes the traditional function rotary dimmer switches, for tungsten, mains and low voltage lamps. See datasheet 11D3 for fluorescent dimmers.

Soft start

The current rises as it is switched on giving better lamp life.

Silence

The digital dimming electronics do not buzz in operation.

Switched fourth terminal

There is an extra line terminal connection (L2) which is switched but not dimmed for connection of a ventilation fan for instance.

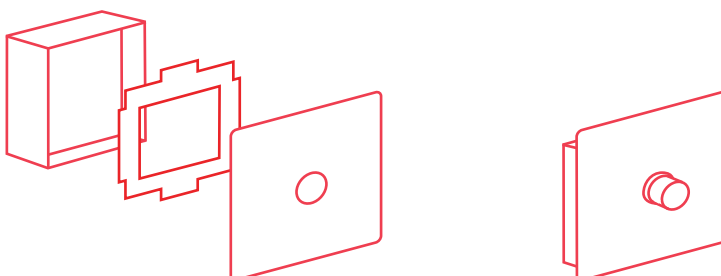

Power

The range can control up to 3 x 400watts or 4 x 300 watts.

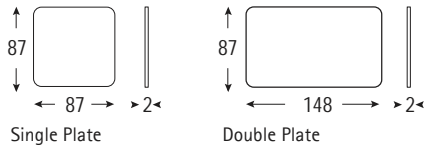

The front plate is made of brass and plated or painted in the standard colours as listed. Special finishes are available on request or the plate can be supplied primed for painting on site.

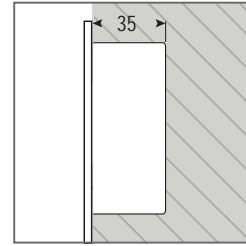

Assembly

Wafer Plate Dimensions

Wall Box Depth - 35mm

Silent Rotary Dimmer Switches - Low Voltage and Tungsten

1,2,3 x 600 watt

Single Plate 1 Button		600 watt	Double Plate 2 Button		2 x 600 watt
