

1 Hour Firehood

Altima's innovative Firehood maximizes safety precautions without compromising lamp life through overheating.

Design

The Firehood is fashioned in a square design to allow the maximum volume around the fitting.

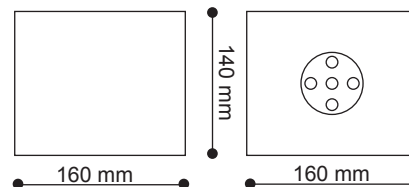

The cable entry openings are located on the sides rather than the top as a cable outlet on the top will become very hot due to heat rising directly from the lamp below.

Construction

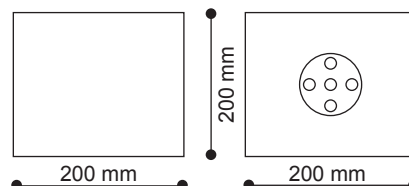

Made of glasscloth with an intumescent coating, it is lightweight, easy to install, rot - proof, durable and unaffected by moisture.

Will withstand exposure to temperatures up to 240° for at least 60 minutes.

12.FH01.00 160 x 160 x 140

12.FH03.00 200 x 200 x 200

Technical Data

Material	flexible intumescent glasscloth
Approvals	BS476 Parts 20, 21, 22, 23 (1987) and BS476 Part 23 Clause 5 (1987)
	BS EN ISO140-3-1995
	complies with IEE 16th Edition Regs.
