

Emergency Test Switch

10min 1 Hour 3 Hour

Altima selective time test switch provides an efficient, cost effective way for testing Emergency lighting. Regular testing is part of the statutory requirements for emergency lighting.

Testing

Selected according to the required time schedule. 10 Minutes / 1 Hour / 3 Hours.

Load

- Fluorescent 6 amp.

We recommend a maximum of 6 fittings, if more please install a contactor.

- Compact Fluorescent 3 amp

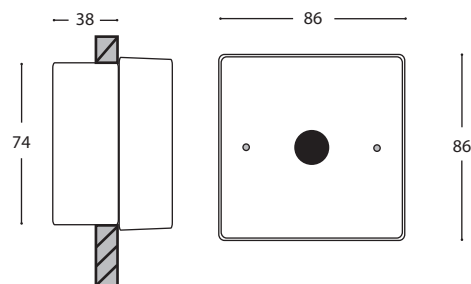

- LED 6 amp

- Tungsten 10 amp

Benefit

Batteries perform more efficiently, lowers the risk of depleting the batteries by leaving them on for prolonged periods.

The device is supplied with a tamper proof test switch. The device can be retro fitted to existing test switches.
