

Button Dimmer Switches

Altima's range of Wafer thin button switches and dimmer controls operate with a remote dimmers or switch pack

The Range can control lamps

LED

Halogen

Fluorescent

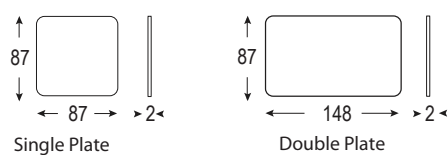

The Wafer button switches and dimmer controls are suitable for **multi-way switching**, this means that they can be controlled from any position that is in the circuit.

The Wafer switches, together with the appropriate packs can control mains, low voltage, fluorescent and LED. The pack can be sighted up to 50 metres away from the switch.

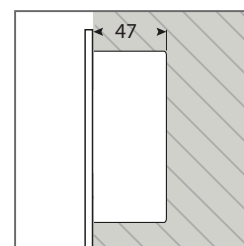

The Halogen Dimmer Pack LS.D701 operates from 50-800 watts. This can be extended with the use of a 600 watt Booster. Several boosters can be joined to the Dimmer Pack, upto a maximum of 5000 watts.

Memory The pack can recall the last light level

Soft start improves lamp life
