

## Multi-way Dimmer and Switch Packs Wiring

The Wafer button switches use one Dimmer Pack for each circuit. The circuit can be switched on and off from the same button and dimmed by holding the button down.

Our Dimmer Pack is suitable for mains and low voltage, halogen and LED.

The button dimmers are suitable for multi-way switching with other button dimmer switches.

**The Dimmer Packs can only be used with Altima electronic transformers and cannot be used with mechanical transformers.**

## Features

### SILENT

The Dimmer Pack runs silently.

### MULTI-WAY

Suitable for Multi-way switching.

### 800 w

800 w load can be extended with a power booster allowing up to 7000 w.
