

## Caterpillar Spotlights

12v 24v Xenon, LED

This is a discrete low voltage linear lighting system with 101 many uses including under-shelf, cabinet and cove lighting.

The system utilises a xenon halogen lamps which has an average life of 20,000 hours. The track can be curved and follow almost any shape and can be cut easily on-site.

We now have a LED option of 1 watt with lamp life of 35,000 hours.

### Temperature

The reflector throws the light forward substantially optimising the light output.

### Installation

The track can be easily fixed with clips or double-sided adhesive tape. The lights are simply plugged into the track where required.

### Fixed Reflector LED

Fitting Part Number lamps see 1H2
